Program Outline & Participation Requirements of The Program for Quality Management [PQM]

16 November – 27 November 2026

1. BACKGROUND OF THE PROGRAMS:

The Association for Overseas Technical Cooperation and Sustainable Partnerships (AOTS) is an organization for human resources development mainly in overseas countries to promote technical cooperation through training, experts dispatch and other programs. Through those programs, we aim at contributing to the mutual economic growth of developing countries and Japan as well as enhancing friendly relations among those countries.

AOTS was established in 1959 with the support of the Ministry of International Trade and Industry (which is the present Ministry of Economy, Trade and Industry: METI) as Japan's first technical cooperation organization on a private sector basis. More than 200,000 individuals from 198 countries and regions have undergone our training in Japan, while the cumulative attendance at our overseas programs till the end of fiscal 2024 exceeded 240,000.

AOTS organizes and develops a various range of training courses based on requests from returning participants and industry in developing countries.

The Program for Quality Management (PQM) is one of the management training courses which is conducted by AOTS, designed for all the developing countries to learn business management/administration techniques and their underlying ways of thinking which are characteristics of Japanese companies as TQM (Total Quality Management). It also aims to upgrade the participants' capabilities of implementing a quality oriented management system.

2. COUNTRY:

- CONTENTS

[Understanding Theory and Methods]

Participants will gain an understanding of the framework and characteristics of TQM activities developed in Japan, as well as the cultural aspects of TQM. Participants will also learn about key TQM elements—such as policy management, daily management, and quality assurance—to acquire a systematic understanding of the subject.

[Company Visits to TQM Implementation Sites]

Beyond classroom lectures, participants will deepen their understanding of the process from TQM implementation to promotion, as well as how key TQM elements are practiced on the front lines, by visiting and observing specific examples at Japanese companies. They will observe how theories and methods function in real-world settings and gain practical insights for implementation.

[Creating an Action Plan for TQM Implementation]

Based on the Challenge Report submitted by the course starting day, participants will engage in group

discussions and receive feedback from the lecturers. Following the group discussions, participants will revise their Challenge Reports using the TQM implementation and promotion methods and case studies learned during the course. They will then create an action plan that can be implemented at their own companies and present it on the final day of the course.

Note: Participants are requested to bring any supporting information and data related to their own problems of quality management or quality assurance to make more effective and realistic action plan.

A typical daily schedule consists of a 3-hour morning session and a 3-hour afternoon session. Some evening sessions will also be organized as well as identified above. Please refer to the Tentative Schedule.
